

PERFORMANCE YOU CAN COUNT ON

## DECORATIVE/OVEREDGE

With the features, versatility and precision of the Merrow Decorative/Overedge machines you're always on the leading edge.

The overedge stitch that Merrow invented and perfected is often referred to in the trade as "Merrowing". This useful stitch is essential to cleaning and sealing the edge of fabrics during production or for adding decorative flair to items ranging from baby blankets to wedding gowns.

The Merrow Decorative/Overedge machines produce a variety of stitches that have proven themselves under heavy usage. The range of feed options includes differential, single row, double row, coarse teeth, fine teeth, and rubber (for processing sheer fabrics). Choose from neat edge finishing for toweling (MG-3DR), high speed shell stitching (MG-3Q-3), narrow rolled edge finishing (MG-2DNR-1), and a fine edge finishing machine for embroidered emblems (MG-3U).
